PROFESSIONAL SUMMARY

Data Science-focused Computer Science undergraduate with over two years of experience in machine learning, predictive modeling, and data-driven research. Award-winning researcher with strong foundations in Python, Scikit-learn, deep learning, and statistical analysis. Proven ability to design end-to-end ML solutions, from data preprocessing and feature engineering to model deployment and interpretation, while effectively communicating insights to both technical and non-technical audiences.

CORE DATA SCIENCE AND ANALYTICS SKILLS

Programming and Data Analysis: Python (PCEP Certified), SQL, Pandas, NumPy
Machine Learning and AI: Scikit-learn, TensorFlow/Keras, CNNs, NLP (TF-IDF), SMOTE
Model Evaluation and Explainability: SHAP, Cross-Validation, Confusion Matrix
Data Visualization and Applications: Power BI, Matplotlib, Streamlit, Tableau
APIs and Deployment: FastAPI, REST APIs
Tools and Platforms: Git/GitHub, Jupyter, VS Code
Cloud Foundations: IBM Cloud, AWS (Introductory)

EDUCATION

BSc (Hons) Computer Science | Albukhary International University, Malaysia
October 2023 – Present | CGPA: 3.78 / 4.00

Honors: Dean's List (Awarded every semester)
Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Structures and Algorithms, Operating Systems, Internet of Things

EXPERIENCE

Web Developer Intern | Avidity International | March 2025 – August 2025

- Analyzed backend system issues and platform performance, contributing to improved system stability and data flow reliability.
- Collaborated with cross-functional teams to diagnose and resolve technical issues, strengthening analytical problem-solving and systems understanding.

Co-Founder and Lead Instructor | TechNexus (Student-Led Tech Initiative) | January 2025 – Present

- Co-founded and led a global student initiative aimed at improving technical and analytical competencies among university students.
- Designed and delivered data-driven technical bootcamps to over 200 students, covering Python, databases, and applied problem-solving.
- Represented projects at innovation challenges and institutional showcases, translating technical outcomes into clear stakeholder insights.

Library Associate | Albukhary International University Library | August 2024 – May 2025

- Administered and optimized library database systems, improving information organization and retrieval efficiency.
- Supported students in academic research activities, reinforcing data literacy and structured analytical thinking.

PROJECTS

Unified Smart Lighting and CCTV Integration Platform (Final Year Project)

Python, REST APIs, Cloud Integration | October 2025 – January 2026

- Designing a brand-agnostic IoT and analytics platform integrating smart lighting systems and CCTV for automation and energy optimization.
- Architected a four-layer system comprising interface, processing, data, and device layers with secure communication and scalable APIs.

- Applying data-driven monitoring and analytics concepts to support intelligent decision-making across connected systems.

Traffic Congestion Prediction (Best Paper Award)

Python, Scikit-learn, Research | March 2025 – June 2025

- Awarded Best Paper for “Predictive AI Models for Traffic Prediction” on June 30, 2025.
- Built and evaluated predictive models for short-term traffic forecasting using engineered temporal features.
- Compared classical machine learning algorithms with neural networks, achieving strong performance validated through cross-validation.

Customer Churn Prediction System

Python, Scikit-learn, SHAP, SMOTE | June 2025 – July 2025

- Developed a supervised machine learning model to predict customer churn using feature engineering and class imbalance handling techniques.
- Applied SHAP to interpret model predictions and identify key drivers of customer attrition.
- Translated analytical results into actionable insights to support data-informed business decisions.

Deep Learning Handwriting Recognition System

Python, TensorFlow/Keras, OpenCV | December 2025

- Built a CNN-based writer identification system achieving 87 percent test accuracy across 70 handwriting styles.
- Designed a custom preprocessing pipeline using OpenCV for segmentation and data augmentation.
- Deployed the trained model through a FastAPI REST endpoint to enable real-time inference.

Personal Library and Book Recommendation System

Python, Streamlit, NLP (TF-IDF) | November 2025

- Developed a hybrid recommendation engine combining metadata-based filtering and TF-IDF similarity scoring.
- Built an interactive Streamlit dashboard to deliver personalized reading insights and recommendations.

AWARDS AND COMPETITIONS

Winner, On-Campus Hult Prize (2025) – Social Entrepreneurship

Best Paper Award, Predictive AI Models for Traffic Prediction (2025)

Best Project Award (Social Cluster), Sustainability and Society (2024)

Grand Heritage Ambassador, AIU Cultural Week (2025)

LEADERSHIP AND VOLUNTEERING

- Moderator, Kedah Maker Fair – Facilitated technology-focused discussions at a state-level innovation event
- Moderator, AIU Center of Reference – Hosted alumni and academic talk sessions
- Train-the-Trainer, Young Innovators Challenge – Certified mentor for innovation and design thinking
- Participant, Google I/O Extended and Build with AI – Exposure to generative AI and cloud technologies
- Volunteer, Malaysia Volunteerism Program – Community development engagement at Kampung Pantai Jemai

CERTIFICATIONS

PCEP: Certified Entry-Level Python Programmer

IBM Data Fundamentals

IBM Cloud Essentials

Kaggle: Advanced SQL, Data Visualization, Introduction to Machine Learning

Qubit x Microsoft Azure: Quantum Winter School
